

## Great news — our office is open!

May 1, 2020

**We have GREAT news for our patients!** Beginning Monday, May 4 we are able to begin seeing patients. At first, to comply with state guidelines, we will only be able to see certain types of appointments. We expect that the following week (beginning May 18) we will be welcoming back ALL patients except those who's treatment could produce aerosols (for example, removing braces). We will need adjustments in state guidelines before these procedures can be scheduled.

**More GREAT news for our patients...** you have had the significant advantage over other practices due to our use of remote monitoring of care with Dental Monitoring. We have been able to continue monitoring your progress and the health of your teeth on a weekly basis.

Be assured that our opening will exceed all guidelines for safe professional care. These guidelines will include:

- social distancing
- appropriate screening of patients including taking of temperatures
- air sanitizers
- necessary protective gear
- the sanitizing of surfaces between patients

A visit to our office will be safe beyond standards set by state and professional organizations. Our collective OSOLC health is our utmost importance!

**Please note that we will be calling you to schedule your appointment, and we will be scheduling appointments in order of your original appointment date.**

Welcome back! We look forward to seeing you again! And thank you all for your continued patience!!

The doctors and team of OSOLC
